

Monthly Safety Meeting

Sure, automation can aid pilots significantly in building situational awareness, but it can also distract pilots to the point of interfering with basic aircraft control. Bill Smith has prepared a briefing to point out some of the main capabilities of the iPad when using an aviation app like ForeFlight. Although he will highlight the features of the iPad and ForeFlight that will aid pilots during flight, his presentation applies to all tablets and navigation software. His emphasis will be on the additional distractions and tasks that are created when programming and operating tablets and what this means in a single-pilot aircraft with automation management (AM) and single-pilot resource management (SRM).

Directions: Drive to 1801 9th St, Wichita Falls.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
